ABOUT

Cybersecurity undergraduate specializing in cloud security, security engineering, and systems architecture. I build security-first systems — from end-to-end encrypted storage to breach intelligence tooling — with a focus on real-world applicability. Fluent in Rust and Python, comfortable at both the application and OS layer, and grounded in security standards.

TECHNICAL SKILLS

Security & Pentest	Web application security, OS & database security, cryptography, ABAC access control, secure coding, cloud security, ISO 27001 familiarity
Languages	Rust (preferred), Python, Bash, SQL, JavaScript, C (learning)
Systems & OS	Arch Linux (2 yrs daily use), system architecture, scripting & automation, Docker
Development	API design (FastAPI, Rust), web scraping (Selenium), scientific computing
Databases	PostgreSQL, MinIO (object storage)
Forensics / Intel	Security intelligence engineering (IBM certified), digital investigation fundamentals

PROJECTS

Secure Drive

github.com/AymanAbdulgalil/Secure-Drive

Open-source security-focused cloud storage system

Active Development

- ▶ Full-stack secure file storage with end-to-end encryption and granular access control — demonstrates understanding in data confidentiality, integrity, and availability
- ▶ Implements ABAC-based permission model for multi-user environments, mirroring enterprise security architecture
- ▶ Stack: FastAPI · PostgreSQL · MinIO · React · Docker

CUIMS Scraper

github.com/AymanAbdulgalil/CUIMS-Scraper

Credential-based web scraper for university student portal

Under Rework

- ▶ Automated form parsing and OCR-based input handling — demonstrates practical understanding of web application authentication flows and their weaknesses
- ▶ Stack: Python · Selenium · Pytesseract

HIBP Wrapper

github.com/AymanAbdulgalil/hibp_wrapper

Rust-based GUI wrapper for the Have I Been Pwned API

Partial Implementation

- ▶ Native desktop tool for credential breach lookup using the k-anonymity model — applies threat intelligence concepts relevant to security intelligence work
- ▶ Stack: Rust · Slint UI

ABC Optimizer

github.com/AymanAbdulgalil/ABC-Optimizer

Artificial Bee Colony optimisation algorithm

Archived

- ▶ Python app for heuristic optimisation research; demonstrates algorithmic problem-solving applicable to security automation

CERTIFICATIONS

Completed

- ▶ Cybersecurity Professional Certificate — Google
- ▶ Security Intelligence Engineer — IBM
- ▶ Networking Essentials — Cisco
- ▶ IT Specialist: Cybersecurity — Pearson
- ▶ Scientific Computing with Python, 300 hrs — freeCodeCamp
- ▶ Introduction to Psychology — Yale University
- ▶ Learning How to Learn — Deep Teaching Solutions

In Progress

- ▶ Security+ — CompTIA
- ▶ Certified in Cybersecurity (CC) — ISC²

EDUCATION

BE – CSE – Information Security

Chandigarh University – Apex Institute of Technology

India · Expected 2027

- ▶ Ranked **15th** in second year batch-level university AMCAT examination among 5,000+ students.

TOEFL

Exceed Language Learning Center

Yemen · 2022

- ▶ A final score of **97/120**, near native fluency level.

High School Education – XII

Almutafwqin Private School

Yemen · 2021

- ▶ A final score of **94.63%** on the country level final examination.

LANGUAGES

Arabic Native

English Fluent — TOEFL Certified
